EDUCATION

University of Texas at Dallas
Bachelor of Science in Computer Science

Richardson, TX
Aug. 2022 – Dec. 2026

EXPERIENCE

Area Manager Intern

Amazon

Jun. 2023 – Aug. 2023; Jun. 2024 – Aug. 2024

Jeffersonville, IN; Fort Worth, TX

- Led the development of a web app for virtual drop zone management, boosting operational efficiency near late-to-stow periods by 15%.
- Tested with 50+ warehouse associates simultaneously, ensuring reliability and usability in a high-throughput environment.
- Worked directly with operations teams to gather requirements and ship features that replaced manual coordination and reduced decision time during peak periods.
- Owned the full development lifecycle (design, build, testing, deployment) and iterated based on real user feedback.

PROJECTS

ExpressifAI | *Python, OpenCV, Google Cloud Vision API*

Sep. 2024 – Dec. 2024

- Built a real-time computer vision system to detect facial expressions and head movements, supporting assistive communication for 15+ users.
- Processed live camera input with latency under 200 ms, enabling responsive interaction and consistent performance.
- Integrated Google Cloud Vision API for facial detection and emotion classification, achieving 85% accuracy in controlled testing scenarios.

SugarSense | *Python, Pandas, scikit-learn, Machine Learning*

Jan. 2024 – May 2024

- Developed a machine learning web application that predicts diabetes likelihood with 81% accuracy on 1,000+ patient records.
- Performed data preprocessing, feature engineering, and exploratory analysis across 15+ health variables, reducing inconsistencies by 40%.
- Balanced model performance with interpretability to support more practical and trustworthy predictive decision-making.

KickMap | *React, JavaScript, Firebase, HTML/CSS*

Jan. 2024 – May 2024

- Built a full-stack campus event platform supporting real-time updates, RSVP tracking, and notifications for 40+ users across 10+ events.
- Implemented dynamic filtering and responsive UI components, reducing user navigation time by 30% during testing.
- Integrated Firebase for real-time data synchronization, supporting concurrent usage by 20+ users.

EasyTeller | *OpenCV, Tesseract, SambaNova Cloud API, Full-Stack Development*

Nov. 2024

- Built an AI-powered credit application system to evaluate users without traditional credit history, processing 25+ applications in testing.
- Implemented OCR pipelines using OpenCV and Tesseract to extract structured data from documents with 80% accuracy.
- Integrated fraud detection workflows and external APIs, reducing manual verification time by 40%.

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, Java, C/C++, SQL, HTML/CSS, MIPS

Frameworks & Platforms: React, SvelteKit, Firebase, MongoDB, UNIX

Libraries & Tools: Pandas, NumPy, PyTorch, TensorFlow, Matplotlib, Git, Jupyter Notebook

Concepts: Full-Stack Development, REST APIs, Requirements Gathering, Data Mapping, Predictive Analysis, Technical Documentation
