Nabil Fadili

(469) 434-9003 | nabil.x.fadili@gmail.com | linkedin.com/in/nabil-fadili9484 | github.com/nabil931260

EDUCATION

University of Texas at Dallas Richardson, TX
Bachelor of Science in Computer Science Expected Spring 2027

EXPERIENCE

AI Trainer & Model Evaluator May 2026 – Present
Handshake AI

- Review AI-generated code changes in repository-based tasks, checking solution diffs, test coverage, and documentation against stated requirements.
- Assess test setup and validation results to determine whether proposed solutions address the stated problem; document findings with code and test evidence.
- Write technical feedback and reusable review checklists; evaluate image, audio, and research outputs for factual accuracy and instruction following.

Area Manager Intern Jun 2023 – Aug 2023; Jun 2024 – Aug 2024
Amazon *Jeffersonville, IN; Fort Worth, TX*

- Led development of a virtual drop-zone management web application that improved operational efficiency by 15% during late-to-stow periods.
- Tested the application with 50+ warehouse associates simultaneously, assessing reliability and usability under concurrent use.
- Gathered operations-team requirements and delivered features that replaced manual coordination; owned design, implementation, testing, deployment, and iteration from user feedback.

PROJECTS

KickMap | *SvelteKit, TypeScript, Firebase* | Code Jan 2024 – May 2024

- Developed a campus event prototype with event creation, filtered search, and email/password authentication.
- Used Firestore for event storage and retrieval and Firebase Authentication for sign-in.

ExpressifAI | *Python, PyTorch, CLIP, OpenCV* | Code Sep 2024 – Dec 2024

- Built a webcam-based computer vision prototype for assistive communication using OpenCV and PyTorch.
- Integrated CLIP action-label matching and torchvision model inference into a pipeline that combines predictions into text output.

EasyTeller | *SvelteKit, TypeScript, FastAPI, MongoDB* | Code Nov 2024

- Built a credit-application prototype with a SvelteKit frontend and Python/FastAPI backend.
- Implemented document extraction with OpenCV/Tesseract and integrated SambaNova model calls with application-data workflows.

SugarSense | *Python, Pandas, scikit-learn, Gradio* | Code Jan 2024 – May 2024

- Built an educational classification prototype using 768 records with eight input features.
- Compared classification models and created a Gradio interface to explore predictions.

AssetForge | *React, TypeScript, Vitest, React Testing Library* | Code May 2026

- Built a browser-based tool to validate asset folders, identify duplicate filenames, and export JSON manifests.
- Added unit and UI tests for validation logic and application behavior using Vitest and React Testing Library.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C, C++, SQL, HTML/CSS
Frameworks and Platforms: React, SvelteKit, Firebase, MongoDB
Libraries and Tools: Git, UNIX, Pandas, NumPy, scikit-learn, OpenCV, Tesseract, Jupyter Notebook
Development: REST APIs, full-stack development, requirements gathering, code review, testing, documentation
